## ✔ Why Choose Sphinx Big Bag packing Machine?

The Sphinx big bag packing machine is a set of special packaging equipment for bulk materials with large packaging capacity, which integrates weighing, bag hanging, bag clamping and conveying. It has the functions of weight display, automatic bag removal, fault alarm, etc. This machine is suitable for super dry powder, cement, dry mortar, aluminum oxide powder and any other powder materials.

## ✔ Product Features

1. Accurate weighing  $\pm 1\%$

2. Intelligent control system

3. Flexible packaging

4. Optimized structure design

5. Multi-field applicability

## About Us

Sphinx for Engineering Works founded in Egyptian market since 2007 with its own factories over 14000 square area specialized in manufacturing of Batching Plants - Mining Equipment - Bulk Handling Equipment and complete turn key projects in industrial section (Cement - fertilizers - Concrete). Plus our stock of spare parts for massive industrial application as (Valves - Motors - Gear Boxes - Rollers - Electric Components - Pneumatic Valves - Actuators - Pistons - Hydraulic Components). With our special division for weighing systems, we include all types of weighing systems. We ensure our commitment of high standard quality for all our products and services supported by a very high experience team over 30 years of industrial application experience.
